

Image Asset Guidelines

Standards for uploading and managing image assets across web and mobile platforms.

Category	Use Case	Preferred Size	Max Size	Format	Notes
Product Image	PDP main / zoom	1400–1600 px	2000 px (max 2400 px if required)	JPG	Maintain quality for zoom
Product Thumbnail	Listing / grid	300–500 px, 50–150 KB	800 px, 300 KB	JPG	Must load instantly
Collection / Pages Banner (Desktop)	Collection, homepage, promo banners	1600–1800 px, 300–700 KB	2500 px, 1 MB	JPG	Covers all large banners
Collection / Pages Banner (Mobile)	Mobile banners (all types)	800–1200 px, 200–400 KB	1500 px, 700 KB	JPG	Separate from desktop
Background Images	Section backgrounds	1400–1800 px, 300–600 KB	2500 px, 1 MB	JPG	Avoid heavy usage
Icons (UI)	Buttons, small icons	24–64 px, <20 KB	128 px, 50 KB	SVG	Always prefer SVG
Icons (Illustrative)	Feature icons	64–128 px, <30 KB	256 px, 80 KB	SVG	Keep scalable
Logos	Brand logos	100–300 px, <50 KB	500 px, 100 KB	SVG	Ensures sharpness
Misc Images	Any other images	≤1600 px, ≤500 KB	2000 px, 1 MB	JPG	Size based on screen area covered (larger display → higher res, smaller card → lower res)

Mandatory Rules

- Preferred size is ALSO the minimum required size — do NOT upload smaller images (upscaling will break UI quality)
- Always use JPG for photos/images (use PNG only when transparency is required)
- Always use SVG for icons and logos
- Keep image file size under 1 MB (Do not reduce quality to achieve this — images must remain sharp with no visible blur or pixelation)
- Never upload images wider than 2500 px
- Always create separate mobile and desktop banners

This Ensures

- Consistent visual quality across web and mobile (no pixelation or blur)
- Faster loading and better app/web performance
- Reduced memory usage in mobile apps (avoids crashes and lag)
- Cleaner and more maintainable asset management
- Efficient use of storage (prevents overuse of limited storage in Shopify)
